Videotron revamps Fibre Hybrid Internet plans to give high-speed users more

Montréal, September 28, 2016 – Videotron announced today that it is revamping its residential Internet access services in order to streamline the plans and afford customers greater flexibility. The new Fibre Hybrid service tiers will make ultra-high-speed service even more affordable.

The changes also include free rental of a New Generation Wi-Fi router with a new 30, 120 or 200 Mbps service. In addition, consumers who choose 120 Mbps, 200 Mbps or Giga service get unlimited data. The ultra-high speeds are available as of now on Videotron’s hybrid network.

The six Fibre Hybrid Internet service tiers let consumers access cutting-edge Internet service at very reasonable prices.
