### **Videotron rolls out 2 GIGA Internet in select areas of Québec**

**Montréal, April 10, 2026** — Québec telecommunications leader Videotron today announced the launch of 2 GIGA residential Internet service, featuring download speeds up to 2,000 Mbps and upload speeds up to 200 Mbps at the access point. This new service, designed for households with ever-growing digital needs, is available now in select markets across Québec.

“At Videotron, our ambition has always been to equip Quebecers with the best tools to fully embrace the digital age,” said Pierre Karl Péladeau, President and CEO of Quebecor. “Our new 2 GIGA plan is another step forward in our ongoing commitment to innovation and to our customers.”

#### **A concrete response to the needs of today’s connected households**

Today, many households juggle working from home, playing online games, streaming videos and making video calls at the same time. 2 GIGA Internet delivers the speed and fluidity to do it all, without compromise. It offers twice the download speed and four times the upload speed of Videotron’s existing GIGA plan, at the access point.

Eligible customers can make the switch to 2 GIGA Internet without any new equipment. Unlimited data is included at no extra charge.

#### **Gradual rollout, lasting commitment**

The launch of 2 GIGA Internet builds on the success of Videotron’s GIGA plan, which is now available across almost its entire network. This solid foundation and continued investment in Videotron’s facilities have made this next step possible.

2 GIGA Internet is now available in parts of Montréal, Laval and Québec City, with expansion planned across more of Videotron’s network in the coming months. It complements Videotron’s symmetrical speed 2.5 GIGA Internet plan, ideal for high-intensity simultaneous use, which has been available in many areas of Québec for several months.

Customers can check availability in their neighbourhood and subscribe online at [videotron.com](https://videotron.com).

#### **About Videotron**

**Videotron**, a wholly owned subsidiary of **Quebecor Media Inc.**, is an integrated communications company engaged in television, entertainment, Internet access, wireline telephone and mobile telephone services. Videotron is the fourth strongest and competitive wireless service provider in Canada with, as of December 31, 2025, 4,402,000 subscriber connections to its mobile telephony services. Videotron is also a leader in new technologies with its **Helix** home entertainment and management platform. As of December 31, 2025, Videotron was serving 1,740,100 subscribers to its Internet services, 1,251,200 television customers as well as 547,700 to its wireline telephony service. Finally, Videotron has taken the coveted title of “most respected

telecommunications provider in Québec” for the 19th time since 2006, according to the 2025 Léger Reputation survey.
